Solutions for Chromatography

Your Reliable Supplier of Chromatography Vials,
Septa, Closures & Syringe Filters.

www.alwsci.com

**BE SIMPLE,
BE PROFESSIONAL**

Be Simple, Be Professional

/// Customize your laboratory solution

As a global supplier of Chromatography Vials, Closures, Septa and Syringe Filters, ALWSCI devotes analytical testing and laboratory consumables to providing high quality, efficient service and favorable price.

Besides, ALWSCI owns 40,000 SQM factory area with 20,000 SQM 100,000 grade cleaning room. To keep stable quality, improve productivity, and avoid any contamination from human interference, ALWSCI has invested in more than 100 automatic production lines presently.

To offer a better solution for sample preparation, full production line is available, including a series of sample vials from 1ML to 2,000ML, Septa from 4mm to 55mm diameter, and Syringe filters made of various membranes.

We would like to draw your attention to Ultra-Clean Septa and EPA Quality Vial Kit. These high quality consumables are mostly used for LC/MS, GC/MS and MS/MS in the environmental, chemical, food and pharmaceutical industries.

We have customers from pharmaceutical, life science, chemistry, technology, food processing industry and so on. Others like Universities, research institutions, government institutions, environmental test institutions, etc.

Do you want to learn more about innovations and developments in laboratory technology faster? Please visit www.alwsci.com

Certificate

ALWSCI has obtained ISO/IEC17025, ISO13485:2016, ISO9001:2015, ISO45001 and ISO14001 certificates, and has also set high quality standards for itself and is fully responsible for all customers. In addition, we actively support the government's "Waste-Free City" initiative by adopting environmentally friendly practices to reduce industrial emissions of wastewater, waste gas, and solid waste, and have been certified as a "Waste-Free Factory." (Please contact our sales department before ordering. We will be happy to determine if we can provide the required certificate for your order.)

More

Further products are available upon request! Hopefully you will find the introduction of our company not only informative, but also interesting.

We would like to thank you for taking time to visit our website.

ALWSCI®

ALWSCI®

- Analysis: Autosampler Vials & Closures.
- Storage: Sample Vials & Closures.

Labfil®

- Filtration: Syringe Filters, Membranes, and etc.

Why choose us?

- Providing a wide range of Lab consumables.
- Variety OEM/ODM services and short delivery time.
- Rich experience with multinational companies.
- Dimensional accuracy for modern robotic autosamplers.
- Help to collect, identify, organize and protect your samples.
- Class 100,000 grade cleaning room, strict QC and R&D department center.
- With environmentally friendly packaging material.
- Cooperating with famous universities for R&D.
- Superior logistics system to offer door to door services.
- Efficient service and competitive price.

Bonded Closures

- Our bonding machines are fully automated to bond liners to caps using a mechanical bond without any adhesives or chemicals.
- No glue contamination.
- No additional assembly.
- Prevent liner fallout.
- Use with different polypropylene caps.
- Available in 1mm-3mm standard thicknesses; customization is available.
- Ideal for medical devices, diagnostics packaging and specialty chemicals.

Blue 9-425 Open Top Ribbed Screw Cap with 9mm White PTFE/Red Silicone Septa 1mm Thick (UltraClean).	Blue 9-425 Open Top Ribbed Screw Cap with 9mm Blue PTFE/White Silicone Septa 1mm Thick PRE-SLIT (UltraClean).
Package	100pcs/pk			

Ultra-Clean Series

- While your instruments, sample processing, and experimental methods are constantly improving, your chromatography injection vial cap septa cannot be left behind to ensure that the quality of every part of the experimental process (including sample vials and caps) is successful.
- ALWSCI Varefied® vial cap septa undergo a proprietary cleaning process that greatly reduces background particulates and their potential impact on high-sensitivity chromatography experiments.
- At the same time, the packaging with tear-off strips puts you in a good mood for experimentation.

Package	100pcs/pk		

EPA/TOC Vials & Closures

- If you are doing any sampling, testing, or validation, you need to make sure the results were not skewed by a contaminant that may have come from the container.
- ALWSCI offers a range of certified EPA Screw Vial Convenience Kits which are suitable for all TOC manufacturers' instruments, including Sievers, Shimadzu, OI Analytical, and Teledyne-Tekmar.
- All Certified to contain <10ppb Carbon, giving you confidence in the quality of your TOC measurements.
- Teflon lined caps and protective dust covers.
- Superior vial-to-vial consistency.
- Capped with teflon lined silicone septa and dust cover.
- Widely apply to air, water, soil analysis test, also pesticide residue.

GL45 Safety Caps

- ALWSCI laboratory products are designed by ALWSCI to provide exceptional ease of use and reliable protection in the laboratory, saving chromatographers time and rework while supporting excellent chromatography results. Protect your laboratory environment. Safety systems provide protection and ensure safer laboratory work.
- ALWSCI safety caps are engineered to help you maintain your solvent-free laboratory and feature a special time trip on the air valve to show when the air valve needs to be replaced. Just pull out the old valve and replace it with a new one every six months.
- ALWSCI offers a full range of products to support laboratory safety, including solvent caps for different sized solvent bottles, accessories and more.

Time Strip

The time strip has a lifetime of 6 months and will alert you when to replace the air valve.

How to activate the time strip?

A simple press with the finger on the strip starts the clock for a time of 6 months.

Note: The time strip is a visual reminder. It cannot provide real online information regarding the saturation and contamination of the valve.

Steps in detail:

1. Install the Air Valve at a free port on the Safety Caps and activate the time strip.
2. Guide the solvent tube through the proper fitting on the Safety Caps (std.3.2 mm id) and push the open end through a free port on the Safety Caps.
3. Attach the solvent inlet filter onto the open end of the tubing.
4. Screw the Safety Caps on top of the solvent bottle.
5. Adjust the height of the solvent inlet filter within the bottle.
6. Finally tighten the fitting by turning it clockwise.

Air Valve Working Information

GL45 Safety Cap				
Ref.No.	C0001828	C0001829	C0001830	C0001846
Description	Black GL45 Safety Cap with 2 ports Including 1x Air Valve and 1 x 1/4"-28 fitting for 1/8" tubing.	Black GL45 Safety Cap with 3 ports Including 1x Air Valve and 2 x 1/4"-28 fitting for 1/8" tubing.	Black GL45 Safety Cap with 4 ports Including 1x Air Valve and 3 x 1/4"-28 fitting for 1/8" tubing.	GL45 Air Valve (Including a time strip).
Package	1set/pk			10pcs/pk

GL38 / GL40 Safety Cap				
Ref.No.	C0002884	C0002885	C0002886	C0002887
Description	Grey GL38 Safety Cap with 2 ports Including 1x Air Valve and 1 x 1/4"-28 fitting for 1/8" tubing.	Grey GL38 Safety Cap with 3 ports Including 1x Air Valve and 2 x 1/4"-28 fitting for 1/8" tubing.	Purple GL40 Safety Cap with 2 ports Including 1x Air Valve and 1 x 1/4"-28 fitting for 1/8" tubing.	Purple GL40 Safety Cap with 3 ports Including 1x Air Valve and 2 x 1/4"-28 fitting for 1/8" tubing.
Package	1set/pk			

PP Fitting					
Ref.No.	C0001881	C0001896	C0001883	C0001895	C0001882
Description	1/4-28 PP Fitting for 1/8" OD Tubing Orange Color.	1/4-28 PP Fitting for 1/8" OD Tubing Blue Color.	1/4-28 PP Blind Plug Black Color.	1/4-28 PP Fitting for 1/8" OD Tubing Red Color.	1/4-28 PP Fitting for 1/16" OD Tubing Blue Color.
Package	100pcs/pk				

Safety Caps

- The Safety Caps can protect your laboratory environment.
- The safety system offers protection and ensures safer work in lab.
- The integrated PTFE layer captures dust and other contaminants from the air.
- The ergonomic design allows an easy and tool free replacement of solvent due to freely rotatable cap-inserts and finger tight fittings that avoid twisted tubes during container exchange.

GL45 Safety Cap			
Ref.No.	C0000270	C0000271	C0000272
Description	Blue GL45 Safety Cap with Two holes for 1/8" inch OD tubing.	Red GL45 Safety Cap with Three holes for 1/8" inch OD tubing.	Yellow GL45 Safety Cap with Four holes for 1/8" inch OD tubing.
Package	1pc/pk		

GL45 Safety Cap			
Ref.No.	C0000273	C0000274	C0000275
Description	Blue GL45 Safety Cap with Two holes for 1/16" inch OD tubing.	Red GL45 Safety Cap with Three holes for 1/16" inch OD tubing.	Yellow GL45 Safety Cap with Four holes for 1/16" inch OD tubing.
Package	1pc/pk		

PEEK Fitting			
Ref.No.	C0000969	C0000970	C0000971
Description	10-32unf PEEK Fitting for 1/16 OD Tubing Natural Color.	1/4-28 PEEK Fitting for 1/8" OD Tubing Natural Color.	10-32unf PEEK Blind Plug Natural Color.
Package	5pcs/pk		

Solvent Waste System

- Using the S60 thread interface, it perfectly matches the conventional waste liquid storage container in the laboratory.
- Equipped with pipeline interfaces of various colors, clearly distinguishing different pipelines.
- Activated carbon can actively adsorb and catalyze the decomposition of toxic and harmful gases to ensure that organic gases are completely adsorbed.
- High-quality materials, high temperature resistance, corrosion resistance, and high cost performance.

Purification Feature:

- The exhaust filter purifies the volatile gases before it is released into the environment. Harmful gas emissions are reduced by 80%.
- Collect HPLC waste safely.
- Suitable for many different containers and hose sizes.
- Protect you from vapors from solvents, acids and alkalis.

Safety Cap			
Ref.No.	C0002565	C0002350	C0002418
Description	Black GL45 Safety Cap with 3 ports Including 1 x fitting 3.2mm and 1 x Blind Plug and 1 x connection for activated carbon exhaust filter.	Black S60 Solvent Safety Waste Cap with 4 ports Including 2 x fitting 3.2mm and 1 x hose connector 5.5 - 8mm ID and 1 x GL14 connection for exhaust filter.	Black S60 Solvent Safety Waste Cap with 5 ports Including 3 x fitting 3.2mm and 1 x hose connector 5.5 - 8mm ID and 1 x GL14 connection for exhaust filter.
Package	1set/pk		

Solvent Waste System			
Ref.No.	C0002056	C0002057	C0003965
Description	Activated Carbon Exhaust Filter.	25L Waste Liquid Storage Container.	Black S60 Solvent Safety Waste Cap with 5 ports Including 2 x fitting 3.2mm and 1 x hose connector 5.5 - 8mm ID and 1 x GL14 connection for exhaust filter and 1 x mechanical level control.
Package	1pc/pk	1pc/ctn	1set/pk

GL45 Reagent Bottle

- ALWSCI GL45 laboratory reagent bottle, made of high-purity transparent boric acid glass 3.3 tube, screw PP cap and PBT material.
- The bottle wall thickness reaches 3.8mm, far exceeding the international level. The product wall thickness uniformity is more consistent, and the wall thickness deviation does not exceed 0.1mm. The bottle body has better air permeability and better aesthetics.
- The Reagent Bottle has high strength, stable chemical properties, and is suitable for long-term storage, transportation and storage of media, biologicals and other liquid solutions for lab, experiment, chemistry, scientific.

GL Series Closed Top Cap					
Ref.No.	C0003198	C0003419	C0003420	C0001006	C0002503
Description	Blue GL32 Closed Top PP Cap.	Grey GL38 Closed Top PP Cap.	Purple GL40 Closed Top PP Cap.	Blue GL45 Closed Top PP Cap with Lip Seal.	Red GL45 Closed Top PBT Cap with Natural PTFE/White Silicone Septa 3mm Thick.
Package	100pcs/pk				

GL Series Open Top PBT Cap					
Ref.No.	C0003319	C0003320	C0003321	C0003322	C0003323
Description	Red GL14 Open Top PBT Cap.	Red GL18 Open Top PBT Cap.	Red GL25 Open Top PBT Cap.	Red GL32 Open Top PBT Cap.	Red GL45 Open Top PBT Cap.
Package	100pcs/pk				

GL Series Closed Top PBT Cap					
Ref.No.	C0003383	C0003389	C0003326	C0003327	C0002502
Description	Red GL14 Closed Top PBT Cap.	Red GL18 Closed Top PBT Cap.	Red GL25 Closed Top PBT Cap.	Red GL32 Closed Top PBT Cap.	Red GL45 Closed Top PBT Cap with Lip Seal.
Package	100pcs/pk				

GL45 Reagent Bottle				
Ref.No.	C0002022	C0002023	C0002024	C0002025
Description	100mL GL45 Clear Laboratory Glass Tubing Bottle 3.3 Borosilicate with ALWSCI Logo. Blue PP Closed Cap with Lip Seal. Blue PP Pouring Ring.	250mL GL45 Clear Laboratory Glass Tubing Bottle 3.3 Borosilicate with ALWSCI Logo. Blue PP Closed Cap with Lip Seal. Blue PP Pouring Ring.	500mL GL45 Clear Laboratory Glass Tubing Bottle 3.3 Borosilicate with ALWSCI Logo. Blue PP Closed Cap with Lip Seal. Blue PP Pouring Ring.	1000mL GL45 Clear Laboratory Glass Tubing Bottle 3.3 Borosilicate with ALWSCI Logo. Blue PP Closed Cap with Lip Seal. Blue PP Pouring Ring.
Package	1set/pk			

GL45 Multi-neck Reagent Bottle	
Ref.No.	C0003418
Description	1000mL GL45 Clear Laboratory Glass Tubing Bottle 3.3 Borosilicate with Four GL45 Side Necks. Blue PP Closed Cap with Lip Seal. Blue PP Pouring Ring.
Package	1set/pk

GL80 Reagent Bottle

- Made of clear laboratory glass bottle molded 3.3 borosilicate.
- Wide mouth reagent bottle uniform thickness, good sealing, glossy surface, stable not mildew, GL80 screw cap.
- For storage and transfer of substances.
- ALWSCI GL80 safety pp cap with 4 ports including 4 x fitting 3.2mm.
- Fully compatible with all the GL80 threads and therefore highly versatile.

Key advantages:

- No evaporation of hazardous gases
- No contamination of solvents
- No crimping of connection tubing
- Easy container exchange
- Cost efficiency (save expensive solvents by avoiding evaporation)

GL80 Reagent Bottle		
Ref.No.	C0002525	
Description	Blue GL80 Solvent Safety Waste Cap with 5 ports Including 4 x fitting 3.2mm and 1 x GL14 connection for exhaust filter.	1000mL GL80 Clear Laboratory Glass Bottle Molded 3.3 Borosilicate. Blue PP Closed Screw Cap.
Package	1set/pk	20pcs/ctn

Scintillation Vial

- Manufactured from low potassium glass tubing.The uniform wall thickness contributes to excellent counting reproducibility.
- Suitable for use with aggressive reagents and tissue solubilizers.
- **Glass material:** Made of low potassium glass tubing, it has better temperature resistance and can carry out various ultra-high temperature experiments.
- **HDPE material:** Made from high density polyethylene with lightweight walls for increased counting efficiency, economical choice.
- Select cap and liner material for your application.

C0003311	20mL Premium Clear Glass Scintillation Vial 27.5x57.5mm with 22-400 White Closed Top PP Cap and Silver Aluminum Foil PE Liner 1.5mm Thick. Vial + Cap + Septa are pre-assembled together. White PP box with dividers.	100pcs/pk
C0003225	20mL Premium Clear Glass Scintillation Vial 27.5x57.5mm 22-400 Screw Thread. White PP box with dividers.	100pcs/pk
C0002444	7mL Clear Glass Scintillation Vial 17x54mm with 15-425 White Closed Top PP Cap and Silver Aluminum Foil PE Liner 1.5mm Thick. Vial + Cap + Septa are pre-assembled together. Packed with dividers.	200pcs/pk
C0000803	22-400 White Closed Top PP Screw Cap with Silver Aluminum Foil PE Liner 1.5mm Thick.	100pcs/pk
C0003158	22-400 White Screw Closed Top Urea Cap with Silver Aluminum Foil PE Liner 1.5mm Thick.	100pcs/pk
C0003144	22-400 White Screw Closed Top Urea Cap and Cone PE Plug.	100pcs/pk

PFAS-Free Vials & Closures

- Microvials for an optimized microsampling with 0.3mL, 0.7mL, 0.75mL, 2mL.
- Ideal for Ion Chromatography, Capillary Electrophoresis, Atomic Absorption, pH sensitive samples, sodium, heavy metals analysis and aqueous samples.
- Monitoring the presence of PFAS in the environment and consumer products has become increasingly important.
- Various methods for testing PFAS have been developed, ranging from laboratory analysis to field test kits.
- These methods typically involve advanced analytical techniques such as liquid chromatography and mass spectrometry, which can accurately measure the concentration of PFAS in samples.

Glass Test Tube

For all analytical procedures from cellular analysis to chemical analysis.

- Made from borosilicate glass tube.
- Screw thread test tubes include PP and PC caps with PTFE/silicone septa.
- Design for COD Analysis, also suitable for instruments and test kits.
- The box is food grade material, environmentally friendly.

15-415 Closure

2. NEW ARRIVALS

- 12mL Breath Testing Vial / 25
- Barcoded Vials / 26-27
- ALWSCI 96 Well Plates For Chromatography / 28
- High Recovery Vial / 29
- Diagnostic Vial / 30
- 4mm Welded Syringe Filter / 31
- 50mm Vent Filter / 31
- NMR Tube / 32
- 2mL Plastic Sample Vial / 33
- ICP-MS Sample Tube / 33
- Media Bottle / 33

12mL Breath Testing Vial

- Suitable for various gas detection instruments, and it has good sealing performance and no impurities which can effectively prevent the movement of the cap during the heating and sampling process. At the same time, it is also suitable for various types of breath tests and the preservation of gases to be measured by various breath mass spectrometers.
- Silicone coating gives people a clear instructions without interfering with the analysis.
- The material of vial is borosilicate glass and cap is high-quality polypropylene.
- Cap color can be customized accordingly.

Package	Vial+Cap+Septa are pre-assembled together. Kit Packing. 100pcs/pk	

Barcoded Vials

- No more smudges no more smears, Better data for your peers.
- One vial, one code. No duplicate barcodeds. You can track every individual vial in system.
- Each barcoded scanned for 100% readability.
- Customized service is workable as request, like 1D, 2D to choose.
- Will not contaminate the samples in anyway.
- The printings on vials are fired on the glass, which makes the printings.
- Can resist all common solutions in laboratories.
- Barcoded vials are annealed at over 500°C, perfect with printing durability and vial inner cleanness.

Barcode Label Templates and Overview

- You only need to provide the barcode content that you want to print on the sample bottle according to your system and tell us whether you want to print a barcode or 2D barcode.

- You need to provide us with the following barcode number, like below:

Sample ID(Barcode Information)
AS20057
AS20058

ALWSCI 96 Well Plates For Chromatography

- This 96 Well Plates Sampling System provides the analyst with 96 completely inert chambers and reduces the risk of cross-contamination from well to well when removing the cover.
- SBS/ANSI standard footprint assures compatibility with all well plates capable prep stations and chromatography autosamplers.
- It offers secure sample containment throughout the analytical sample run.
- We offer EVA mat that stabilizes the sample and is pierced by most instruments.

96 Well Plates Sampling System

- Individual glass vials with closures that provide a resistant surface to the organic eluent, thus maintaining sample integrity.
- Prepare and analyze samples in less time with less lab bench space and storage space required per sample.
- ALWSCI has assembled the Glass Insert with 96 well plate, which provide a more convenient way for your chromatography.

EVA Capmat

- This EVA mat is pierceable and suitable for archiving and ultra-cold storage applications.
- Efficient transport of many samples in a single plate.
- SBS/ANSI standard footprint assures compatibility with all well plates capable prep stations and chromatography autosamplers.

Ref.No.	C0002511	
Description	96 Well Blue EVA Capmat with Red PTFE/White Silicone Septa 1.8mm Thick(UltraClean).	
Package	10pcs/pk

Description	One 96 Deep Well Plate with 350uL 6x32mm Clear Glass Micro Insert Conical. Blue 9mm Open Top Snap Cap with Red PTFE/White Silicone Septa 1.8mm Thick(UltraClean).	One 96 Deep Well Plate with 1mL 7.6x46mm Clear Glass Micro Insert Conical. Blue 9mm Open Top Snap Cap with Red PTFE/White Silicone Septa 1.8mm Thick(UltraClean).
Package	Pre-assembled. 96pcs/pk	

High Recovery Vial

- High recovery vials combine large sample capacities with near full sample extraction.
- Excellent for Compound Storage.
- Smoothly sloped inner conical surface ensures a high level of recovery.

- Manufactured to close tolerances, so enabling use with automated sample handling systems.
- Conical well for maximum sample retrieval.
- Reduce product waste by up to 99%.
- Choice of solid top or open top screw caps for direct access with a syringe.
- Volumes from 0.2mL to 6mL.

Diagnostic Vial

- Diagnostic vials designed for biopharmaceutical and IVD applications.
- Suitable for storage and handling of reagents, standards, buffers, and conjugates.
- Available in clear and amber; amber protects from light degradation.
- Made of USP Type I borosilicate glass with excellent chemical stability and corrosion resistance.
- Colored caps available.

Diagnostic Vial

50mm Vent Filter

- 50mm Vent Filter is designed for sterile gas filtration and container venting applications. It is equipped with a hydrophobic PTFE membrane, offering excellent chemical compatibility and reliable protection against airborne contaminants and liquid intrusion. Ideal for gas sterilization, bioreactor venting, vacuum line protection, and solvent vapor filtration, this filter ensures high flow rates and consistent performance.

NMR Tube

- Made from high-purity Type I Class A borosilicate glass.
- Conforms to standard 5mm × 178mm dimensions.
- Precision-machined for uniform wall thickness, straightness, and concentricity.
- Low paramagnetic content for optimal shimming and high SNR.
- Includes disposable cap.
- Compatible with standard NMR systems and autosamplers.
- Suitable for structure analysis, reaction monitoring, purity testing, and other high-precision applications.

NMR Tube		
	Ref.No.	C0003546
	Description	5x178mm NMR Tube. Borosilicate 3.3. 600 MHz. Concentricity 0.004 mm. Camber ±0.006 mm. Plastic Cap. Tube + Cap will be pre-assembled together.
	Package	5pcs/pk
	Ref.No.	C0003547
	Description	5x178mm NMR Tube. Borosilicate 3.3. 600 MHz. Concentricity 0.004 mm. Camber ±0.006 mm. Plastic Cap.
	Package	50pcs/pk

2mL Plastic Sample Vial

- Made of PE material with excellent resistance to acids, alkalis, and solvents; ensures stable performance under various analytical conditions.
- Conical-bottom design helps concentrate samples and minimizes waste.
- Compatible with a wide range of mainstream GFAAS autosamplers for stable and consistent sample introduction.
- Suitable for routine trace element analysis in graphite furnace GFAAS; ideal for environmental, water, and food testing.

Ref.No.	C0003504
Description	2mL 13x25mm Plastic Sample Vial. Conical Bottom.
Package	1000pcs/pk

ICP-MS Sample Tube

- High-purity PP material ensures purity, preventing metal contamination or interference in analysis.
- Wide compatibility with most ICP-MS autosamplers and mainstream brands.
- Ideal for sample analysis across water, food, environmental, geological, and chemical sectors.

Ref.No.	C0003501
Description	16mL 17x130mm Plastic Tube.
Package	100pcs/pk

Media Bottle

- The bottle is made from 3.3 borosilicate glass, providing excellent resistance to thermal shock and pH performance for sensitive media.
- GL32 PBT cap with butyl stopper for secure, repeated syringe access after sterilization.
- Available in 125mL, 250mL, 500mL,and 1000mL.
- Autoclavable at 121°C while maintaining structural integrity and sealing performance.
- Suitable for anaerobic culture, media handling, and closed-system transfer where pH stability and contamination control are critical.

Media Bottle				
Ref.No.	C0003548	C0003549	C0003550	C0003551
Description	125mL GL32 Clear Laboratory Glass Tubing Media Bottle 3.3 Borosilicate. Red PBT Open Top Screw Cap with Butyl Injection Stopper.	250mL GL32 Clear Laboratory Glass Tubing Media Bottle 3.3 Borosilicate. Red PBT Open Top Screw Cap with Butyl Injection Stopper.	500mL GL32 Clear Laboratory Glass Tubing Media Bottle 3.3 Borosilicate. Red PBT Open Top Screw Cap with Butyl Injection Stopper.	1000mL GL32 Clear Laboratory Glass Tubing Media Bottle 3.3 Borosilicate. Red PBT Open Top Screw Cap with Butyl Injection Stopper.
Package	1set/pk			

3. AUTOSAMPLER VIALS & CLOSURES

- Screw Neck ND8 / 35
- Screw Neck ND9 / 36-37
- Crimp Neck ND11 / 38
- Snap Neck ND11 / 39
- Screw Neck ND13 / 40
- Shell Vial / 40

Screw Neck ND8

- Standard opening vials for GC and HPLC, used on instruments of Shimadzu, Varian, Gilson etc.
- To meet your micro sampling needs, ALWSCI has a variety of micro volume inserts with capacities and designs that can transform our vials from full-capacity to limited volume with one simple step.
- Standard opening requires Micro-insert with a diameter of 5mm.
- Micro inserts with flat base, conical base, with polyspring are available.
- The conical design permits complete sample removal.

8-425 Vial

> 5mm Micro Insert

Micro Insert			
Ref.No.	C0000074	C0000075	C0000076
Description	5x29mm Insert Clear Glass Conical Base with Polyspring.	5x31mm Insert Clear Glass Conical Base.	5x31mm Insert Clear Glass Flat Base.
Package	100pcs/pk		

Screw Neck ND9

- Wide opening 9-425 vials can be used on all common autosamplers, perfectly compatible with Agilent, Thermo Scientific, Waters, Varian, etc.
- Vials with integrated micro-insert are available in clear and amber glass.
- Wide opening 12x32mm, Polypropylene vials have chemical resistance, which are used for atomic absorption, water and protein analysis, capillary electrophoresis, ion chromatography applications etc.
- PTFE/silicone slit shape choices are Pre-slit, Y-shape, cross-shape available.
- The polymer spring acts as a shock absorber that protects against breakage if the needle bottoms out.
- Vials and closures are available for packing into a kit to reduce the risk of contamination of vials in laboratories.

9-425 Vial

Package	100pcs/pk				

Crimp Neck ND11

- The Crimp Vials are used on instruments of Agilent, PerkinElmer, Varian, etc.
- The wide opening crimp cap provides a larger target area for improved autosampler needle accuracy.
- Vials with intergrated Micro-insert are also available in clear and amber glass.
- PTFE/silicone, Natural Rubber/PTFE septa, Pre-slit septa to choose.
- The 3-layer septa of Natural Rubber/Red Buty/PTFE combines the good physical properties of Natural Rubber(Resealability) with good chemical properties of butyl. (See Customized service page)

Package	100pcs/pk			

Snap Neck ND11

- The vials are used on instruments of Agilent, CTC, Thermo Scientific, Waters, etc.
- Snap Ring finish eliminates the need for crimping or decapping.
- The integrated Micro-insert are available for clear and amber glass, micro-inserts can be delivered pre-assembled in vials.
- Snap ring caps are also available in soft material with transparent or blue caps, soft caps are more convenient in handling (push on/off).
- The septa shapes have pre-slit and snow-shape types to choose.

Crimp Headspace ND20

- GC Headspace technology for the analysis of volatile organic solids and liquid samples after gasification.
- The headspace volume has 6ml,10ml, 20ml clear/amber to choose, the bottom has flat, and rounded-flat.
- **Type of Cap:**
Aluminum Cap, Bimetal cap, Magnetic crimp cap.
- **Type of Liner:**
PTFE/silicone, Butyl/PTFE, Butyl, Butyl stopper, Pharma-fix liner.

- Safety Coated Boston Round Bottle / 55
- Wide Mouth Bottle / 56-57
- Volumetric Flask / 58
- QR Code Volumetric Flask / 59

Soil Sampling Jar

- The soil sampling jar is mainly used for the sampling and storage of solid soil, sludge or other high-value chemicals.
- In accordance with EPA method(detection of SVOC or VOC content in water and soil), as well as other methods.
- The cap is made of high-quality polypropylene by injection. Different colors are available, such as black, white and etc.
- The materials of liner are Polyethylene, Teflon or Teflon/Silicone, different materials for different requirements.
- The most important-the performance of sealing is perfect, which ensures that the sample is not contaminated by outside air and other components.

Package	60pcs/ctn	60pcs/ctn	20pcs/ctn	20pcs/ctn

Sample Vials & Closures

- Screw vials for storage purpose, vials with different volumes are available.
- **Vial Color:** Clear, Amber.
- **Cap Color:** White, Black, Red, Blue, Yellow, Green, etc.
- **Septa material:** PE, PTFE/Silicone, PTFE/Butyl, Silicone only, etc.
- Pre-assembled service is available.

Sample Vials Application		
Industry	End use application	
Diagnostic	Reagents,blood media and testing, urine analysis.	
Analytical	Chromatography, DNA testing, genome sequencing.	
Pharmaceuticals	Human injectable, oral liquid dosage,dry fill, animal health.	
Cosmetics	Perfume sampling, fragrance product launches,point of purchase, cosmetic counter giveaways.	
Gas/ Oil/ Water	Municipal & private water testing, energy-oil industry, hydraulic fracturing (tracking).	
Nutraceuticals	Dietary supplements, herbal medications.	
Other	Penny promotion & marketing tools, Essential oils, liquid potpourri.	

Sample Vials & Closures

- Full range of storage vials, both OEM&ODM are available.
- Available in clear and amber glass vials, screw caps with PTFE/silicone septa, PE lined and PE/Alu Foil.
- Extensively in environmental, food, and pharmaceutical applications, suitable for the packaging of various pharmaceutical intermediates, high value-added chemicals, chemical reagents, biological reagents, cosmetics, essences and oils, etc.
- Suitable for long-term storage and transportation of products, has excellent sealing performance.

Tamper-Evident Closures & Glass Bottle

- Tamper evidence is vital for a number of industries, which helps consumers identify whether a bottle has been opened or not before purchasing.
- PTFE/PE liners with polypropylene caps have excellent sealing characteristics and good chemical resistance to acids, alcohols, alkalis, aqueous products, and solvents.
- Kind reminder: tamper-evident cap with different color tamper-evident ring creates a easier identification.
- Come and choose ALWSCI tamper-evident bottles & closures, give customers peace of mind that the products they are buying have not been altered after leaving the manufacturer.

Can be used for Serve As

- Environmental lab samples;
- Analyze lab samples;
- Contaminant-intolerant chemicals;
- High value-added chemicals;
- Acids;
- Reagents, and etc.

Boston Round Bottle

- A classic bottle shape in the packaging industry, the Boston bottle (also known as a Winchester Bottle), can hold almost liquid or solid.
- Traditionally used for pharmaceutical, chemical and laboratory applications, popular uses break the mold and extend across most markets today.
- The clear design makes it easy to identify the contents, and the amber glass bottles provide UV protection for light sensitive components, assisting with keeping your products maintained when storing.

Features:

- Available in clear and amber.
- Sizes:1/2 oz to 32 oz.
- Strong and heavy bottle.
- Classic Boston Round bottle shape.
- Narrow mouth, ideal for solvents, chemicals and sample storage.

Safety Coated Bottle

- Combines the chemical resistance of glass with the safety of plastic.
- Safety Coated bottles help prevent lab accidents, save time, and reduce product liability.Made of glass with a transparent PVC coating that forms a tight bond after cooling.
- In case of breakage, the coating retains contents long enough for safe handling—ideal for volatile substances.

Volumetric Flask

- A volumetric flask is an essential tool used in many laboratories for accurately measuring and preparing solutions for a wide range of experiments.
- ALWSCI volumetric flasks are available in a variety of sizes, from 5ML to 2000ML.
- They have narrow necks, flat bottoms, and single graduation marks, making them more precise than other types of flasks.
- Volumetric flasks are made of high-quality materials such as borosilicate glass, making them durable and resistant to temperature changes.
- They are a must-have for any scientist or researcher who needs to prepare high-precision solutions.

- One of the advantages of using a volumetric flask is that they are highly accurate. The volumetric flasks are calibrated to measure the exact volume of liquid. This accuracy is particularly important in scientific research.
- Another advantage of using volumetric flasks is their ease of use. They are simple and straightforward to use. They are also easy to clean and maintain, which ensures that they remain in good condition for a long time.

Resistant to strong acids and alkalis

Metal element blank low value

Batch metrology certificate

Flask stopper and mouth have good tightness

6. LABORATORY TOOLS

- GC Septa / 61
- Vial Rack / 61
- Crimper & Decrimper / 61

Laboratory Tools

> GC Septa

- GC septa are used in gas chromatography (GC).
- These GC accessories need to introduce the sample without leakage and withstand the high-temperatures of laboratory ovens.

> Vial Rack

- Easy handling and transportation of sample vials.
- Stable standing position because of solid construction.

GC Septa					
Ref.No.	C0000437	C0000982	C0001086	C0000800	C0000993
Description	Orange High Temp Ultra Low Bleed GC Septa 11x3mm Pre-Pierced. Used up to 320°C.	Blue Normal Silicone Septa 10.8x3mm. Used up to 250°C.	Blue Normal Silicone Septa 12.5x3mm. Used up to 250°C.	Orange High Temp Ultra Low Bleed GC Septa 11x3mm. Used up to 320°C.	Orange GC Plug Septa, Ultra Low Bleed Septa, Used Up To 320°C. For Shimadzu.
Package	50pcs/pk				

Vial Rack			
Ref.No.	C0001909	C0001908	C0001840
Description	Red PP Vial Rack 50 Positions for 2mL Vials. With Printing ALWSCI Logo in White.	Orange PP Vial Rack 50 Positions for 2mL Vials. With Printing ALWSCI Logo in White.	White PP Vial Rack 50 Positions for 2mL Vials. With Printing ALWSCI Logo in Black.
Vial Rack			
Ref.No.	C0001265	C0001565	C0000096
Description	Blue PP Vial Rack 50 Positions for 2mL Vials. With Printing ALWSCI Logo in White.	Blue PP Vial Rack 50 Positions for 4mL Vials. With Printing ALWSCI Logo in White.	PP Vial Rack for EPA VOA Vials White Color.
Package	1pc/pk		

Crimper & Decrimper							
Ref.No.	C0000265	C0000264	C0000266	C0000267	C0000268	C0000269	C0001385
Description	Crimper for 11mm Aluminum Crimp Cap Stainless Steel.	Crimper for 20mm Aluminum Crimp Cap Stainless Steel.	Stainless Steel Crimper for 13mm Flip off Cap.	Stainless Steel Crimper for 20mm Flip off Cap.	Decrimper for 11mm Aluminum Crimp Cap Stainless Steel.	Decrimper for 20mm Aluminum Crimp Cap Stainless Steel.	Decrimper for 11mm/20mm Crimp Cap(Plier Type).

11 Membrane Filter

Welded Syringe Filter

- Filtration is achieved by pushing the sample through the membrane with a syringe or other luer-connection device.
- Syringe Filters allow you to control the rate off low, which can be critical with delicate samples.
- It also allows you to filter into nearly any tube, vial, or column that represents the next step in your analysis.
- Filter size: 4mm/13mm/25mm/30mm
- Pore size: 0.22um/0.45um

Syringe Filter Selection Guide

- Syringe filters are used for many routine preparation steps in laboratories all over the world.
- They are convenient, ready-to use disposables for removal of particles from solutions and gases.
- Labfil® syringe filters are for a wide range of applications.
- The filters are clean and safe as they are virtually free of leachables and extractables and reliably remove particles and microorganisms without any leakage.
- It is perfect match for the labfil® Luer interface syringe, easy to use, and will not leak to ensure a healthy laboratory environment.

7. WELDED SYRINGE FILTER

- Nylon / 65
- PTFE / 66-67
- PVDF / 68-69
- PES / 70
- CA / 71
- RC / 72

The comparison of Labfil® filter and other brands

Membrane Selection Guide

- Choosing a membrane filter is based on the size and amount of particulate in the sample, the membrane's chemical compatibility with the sample matrix, and potential interactions (binding) between the membranes and the sample components.
- This table offers general guidelines on membrane characteristics and applications.

Membrane Selection Guide

Membrane Types	Features	Common Uses
Nylon	Good chemical compatibility and very low extractables	General filtration sterilization, HPLC sample preparation
Polytetrafluoroethylene (PTFE)	Compatible with strong acids and aggressive solvents	Gas, Air, and Solvent filtration
Polyvinylidene Fluoride (PVDF)	Good flow rate characteristics. Ideal for chromatography applications.	HPLC sample preparation and General filtration

Syringe Filter Diameter	Sample Volume	Pre-Cut Membrane Diameter	Sample Volume
13mm	less 10mL	13mm Pre-Cut Membranes	up to 20mL
25mm	less 100mL	25mm Pre-Cut Membranes	up to 100mL
30mm	less 150mL	47mm Pre-Cut Membranes	multi-liter

Nylon

- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size: 0.22μm and 0.45μm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This Nylon+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- One of the most commonly used membranes; broad compatibility with aqueous and organic solvents, with stable hydrophilicity, not suitable for highly acidic samples.

Applications:

- Used for most organic solvents mixtures and mid-polar liquids.
- Chemical filtration and Beverage filtration.
- Note: Nylon binds protein, do not use when high protein recovery is desired.

PTFE Hydrophilic

- For removing particulates, reducing signal-to-noise ratios and maintaining flat baselines.
- Filtering aqueous and organic solutions.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PTFE+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Broad chemical compatibility choose for filtering aqueous and organic solutions low protein binding.

Applications:

- Industrial Chromatography.
- Filtration of aqueous solutions as well as organic solvents and chemicals.

PTFE Hydrophobic

- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PTFE+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Hydrophobic PTFE membrane has great temperature resistance.
- Suitable for Solvents/Gases/Acids/Bases.

Applications:

- Degassing/Clarifying aqueous samples.
- Removal of protein precipitates.
- Strong acid solvent filtration and Alkali solvent filtration.
- Biofuel analysis.

PVDF Hydrophilic

- Low protein-binding for filtration of non-aggressive aqueous and mild organic solutions.
 - Low UV absorbing extractables and low nonspecific protein binding.
 - Two types in pore size: 0.22µm and 0.45µm.
 - Three types in filter size: 13mm, 25mm and 30mm.
- Features:**
- This PVDF +PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
 - Hydrophilic membrane with good solvent resistance.
- Applications:**
- Sterilizing/Clarifying filtration of biological solutions.
 - Excellent chemical compatibility, even with aggressive acids and alcohols.
 - Filtration of samples where high protein recovery is desired.

Typical data

Material	PVDF Hydrophilic

PVDF Hydrophobic

- Filtration of water-soluble oligomers and polymers, e.g. protein solutions.
 - Filtration of hydrophobic substances in different organic solvents.
 - Two types in pore size: 0.22µm and 0.45µm.
 - Three types in filter size: 13mm, 25mm and 30mm.
- Features:**
- This PVDF + PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
 - This membrane features stability and hydrophobic interactions which is similar to PTFE.
- Applications:**
- Gas filtration, Vapor filtration, High-temperature filtration.
 - Food industry and Medicine filtration.

Typical data

Material	PVDF Hydrophobic			
Pre-filter Membrane	pp

PES

- High flow rates(liquids), low protein binding, low concentrations of extractable substances.
- Low-affinity for proteins and extractable with substantially faster flow rates than PVDF; suitable for pre-filtration and filtration of buffers and culture media.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PES+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Faster flow rate than PVDF.
- Excellent thermal resistance and chemical resistance.

Applications:

- PES is certified for ion chromatography; tissue culture media; filtration of proteins and nucleic acids.
- Suitable for filtration of aqueous solution with high throughput.

Typical data

Material	PES			
Pre-filter Membrane	pp			
Material of housing	pp			
Effective filtration area(cm²)	4mm/0.1cm²	13mm/1.13cm²	25mm/4.15cm²	30mm/5.2cm²

CA

- CA membranes are used for tissue culture media filtration.
- Ideally suited for general filtration and biological/clinical analysis requiring maximum protein recovery.
- High temperature stability can be used with heated liquids.
- Two types in pore size:0.22µm and 0.45µm.
- Three types in filter size:13mm, 25mm and 30mm.

Features:

- This CA+PP pre-filter provides two times greater throughput than standard filter without pre-filtration. Naturally hydrophilic membrane filter.
- Low protein binding: great for protein solutions, such as protein isolation pre-filtration.
- Suitable for ground water filtration. Uniform pore size structure.

Applications:

- Filtration of liquid samples and some organic solvents.
- Cell retention and particle retention.
- Light scattering measurement. Sterilization of liquids.

Typical data

Welded Syringe Filter

RC

- The best option for reliable and leachable free sterilisation of liquids.
- The very low non-specific binding characteristics of this membrane makes it a perfect choice for biomolecule solutions and other dissolved substances.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm.

Features:

- This RC+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Outperforming chemical compatibility choose for biomolecule solutions and other dissolved substances.

Applications:

- Industrial Chromatography.
- Filtration of aqueous solutions as well as organic solvents and chemicals.

8. ECONOMY SYRINGE FILTER

- Nylon / 75
- PTFE / 76-77
- PVDF / 78-79
- PES / 80
- CA / 81
- MCE / 82

Economy Syringe Filter

- In order to meet different customers' requests, Labfil® supplies the syringe filters with outer ring as well.
- It's available in many different pore sizes and with several hydrophilic and hydrophobic membrane materials.
- More Economic.
- Reliable removal of microorganisms and particles from liquids for HPLC sample preparation.
- High mechanical and tensile strength.

HOW TO CHOOSE FILTER SIZE

0-10ml
Sample Volume Use **13mm** Syringe Filter

10-100ml
Sample Volume Use **25mm** Syringe Filter

10-150ml
Sample Volume Use **33mm** Syringe Filter

Female Luer Lock Inlet

Male Luer Slip Outlet

MEMBRANE FILTER SELECTION

Nylon	PES	PTFE	MCE	PVDF	CA
Nylon	Good chemical compatibility and very low extractables		General filtration sterilization, HPLC sample preparation		
PES	High flow rate with good throughput, low protein binding, can be used in high temperature liquids, in inorganic extractable ions.		Ion chromatography certified, tissue culture filtered, and can filter proteins and nucleic acids.		
PTFE	Compatible with strong acids and aggressive solvents		Gas, Air, and Solvent filtration		
MCE	High flow rate and high throughput. High-protein binding. Excellent biocompatibility.		Used for clarification of aqueous solutions and general laboratory filtration.		
PVDF	Good flow rate characteristics. Ideal for chromatography applications		HPLC sample preparation and General filtration		
CA	Extra low non-specific binding. High recovery.		Used for aqueous samples containing proteins, or similar large organic molecules biomolecule solution.		

Nylon

- High mechanical and tensile strength.
 - Universal application for analytical procedures.
 - Two types in pore size:0.22µm and 0.45µm.
 - Three types in filter size:13mm, 25mm and 33mm.
- Features:**
- One of the most commonly used membranes.
 - Broad compatibility with aqueous and organic solvents, with stable hydrophilicity, not suitable for highly acidic samples.
- Applications:**
- Used for most organic solvents mixtures and mid-polar liquids.
 - Chemical filtration and Beverage filtration.
 - Note: Nylon binds protein, do not use when high protein recovery is desired.

Typical data

Material	Nylon		
Material of housing	pp		
Effective filtration area(cm²)	13mm/1.13cm²	25mm/4.15cm²	33mm/5.2cm²

PTFE Hydrophobic

- Hydrophobic PTFE syringe filters have broad chemical compatibility and high pH resistance.
- Versatile filters for use with aggressive organic solvent-based solutions and are especially ideal for HPLC sample preparation.
- Two types in pore size:0.22µm and 0.45µm.
- Three types in filter size:13mm, 25mm and 33mm .

Features:

- Hydrophobic PTFE membrane has great temperature resistance.
- Suitable for Solvents/Gases/Acids/Bases.
- Excellent chemical compatibility for filtering harsh chemicals that destroy other membrane materials and ideal for aerosol sampling.

Applications:

- Degassing/Clarifying aqueous samples.
- Removal of protein precipitates, Biofuel analysis.
- Strong acid solvent filtration and Alkali solvent filtration.

Typical data

Material	PTFE Hydrophobic		
Material of housing	pp		
Effective filtration area[cm²]	13mm/1.13cm²	25mm/4.15cm²	33mm/5.2cm²
Pore size[µm]	0.22/0.45

PTFE Hydrophilic

- Hydrophilic materials are obtained through process improvement.
- Hydrophilic material has a great affinity for water and it's easily wetted by water because of the surface with water molecules to form intermolecular focus.
- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size:0.22µm and 0.45µm.
- Three types in filter size:13mm, 25mm and 33mm.

Features:

- Broad chemical compatibility choose for filtering aqueous and organic solutions low protein binding.
- Low IC extractables.

Applications:

- Industrial Chromatography.
- Filtration of aqueous solutions as well as organic solvents and chemicals.

Typical data

Material	PTFE Hydrophilic		
Material of housing	pp

PVDF Hydrophobic

- Filtration of water-soluble oligomers and polymers, e.g. protein solutions.
 - Filtration of hydrophobic substances in different organic solvents.
 - Two types in pore size:0.22µm and 0.45µm.
 - Three types in filter size:13mm, 25mm and 33mm.
- Features:**
- This membrane features stability and hydrophobic interactions which is similar to PTFE.
 - Naturally hydrophobic membrane provides excellent flow rates and high loading.
 - Exceptional temperature stability provides extended sampling range over other membranes.
- Applications:**
- Gas filtration, Vapor filtration, High-temperature filtration.
 - Food industry and Medicine filtration.

Typical data

Material	PVDF Hydrophobic		
Material of housing	pp		
Effective filtration area(cm²)	13mm/1.13cm²	25mm/4.15cm²	33mm/5.2cm²

PVDF Hydrophilic

- Hydrophilic materials are obtained through process improvement.
 - Hydrophilic material has a great affinity for water and it's easily wetted by water because of the surface with water molecules to form intermolecular focus.
 - Low protein-binding for filtration of non-aggressive aqueous and mild organic solutions.
 - Low UV absorbing extractables and low nonspecific protein binding.
 - Two types in pore size:0.22µm and 0.45µm.
 - Three types in filter size:13mm, 25mm and 33mm.
- Features:**
- Hydrophilic membrane with good solvent resistance.
 - It has superior performance to prevent leak of sample solvent and can promise membrane area being used in a large filtration area.
- Applications:**
- Sterilizing/Clarifying filtration of biological solutions.
 - Excellent chemical compatibility, even with aggressive acids and alcohols.
 - Filtration of samples where high protein recovery is desired.

PES

- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size:0.22µm and 0.45µm.
- Three types in filter size:13mm, 25mm and 33mm.

Features:

- Excellent thermal resistance and chemical resistance.
- Having high flow rates thanks to their symmetric structure.
- A low protein adsorption, is recommended for filtration of protein filtration as well as aqueous solutions filtration.
- The low level extractables make them suitable for environmental analysis.

Applications:

- PES is certified by ion chromatography; tissue culture media; filtration of proteins and nucleic acids.
- Suitable for filtration of aqueous solution with high throughput.

Typical data

Material	PES		
Material of housing	pp		
Effective filtration area(cm²)	13mm/1.13cm²	25mm/4.15cm²	33mm/5.2cm²

CA

- CA syringe filter is made from cellulose acetate, a biocompatible and hydrophilic material.
- These membranes are widely used in filtration applications in biological, pharmaceutical, and laboratory settings.

Features:

- Hydrophilic membrane.
- Low protein binding.
- Low nonspecific adsorption.
- Ideal for filtering water-soluble oligomers and polymers.

Applications:

- Protein matrix samples with high nonspecific binding.
- Sample analysis requiring high recovery.
- Water sample preparation for nitrate/nitrite analysis.

Typical data

Economy Syringe Filter

MCE

- Biologically inert mixtures of cellulose acetate and cellulose nitrate.
- Membranes in analytical and research applications.
- Two types in pore size:0.22µm and 0.45µm.
- Three types in filter size:13mm, 25mm.

Features:

- Ideal for capturing and culturing microorganisms in the Water and wastewater industry.
- Used to determine particulate contamination of lubricating oil and hydraulic fluid in patch test kits.
- Compatible with gamma irradiation.

Applications:

- Appropriate for bacterial culturing, including E. coli culturing.
- Biologically inert with good thermal stability.
- Uniform microporous structure results in high flow rates when used for filtering.

Typical data

Laboratory Syringe

- Made of high quality PP material with good chemical resistance.
- All batches of this product are produced in an ISO 9001 compliant clean environment.
- Additionally, all syringes are designed to match with ALWSCI syringe filters, and they can also be used with ALWSCI vials.

Syringe Usage Guide

Description	2mL Disposable HPLC Laboratory Sterile Syringe. Plastic/Paper Individual Packing.	5mL Disposable HPLC Laboratory Sterile Syringe. Plastic/Paper Individual Packing.	10mL Disposable HPLC Laboratory Sterile Syringe. Plastic/Paper Individual Packing.	20mL Disposable HPLC Laboratory Sterile Syringe. Plastic/Paper Individual Packing.
Package	100pcs/pk			

Glass Solvent Filter

- Glass solvent filter is mainly used in high-performance liquid chromatography flow phase filtration, particulate material analysis and microbial pollution detection, and it is one of the standing equipment in the chemical laboratories.
- Using the glass solvent filter in the process of chromatographic analysis can effectively filter out the impurities that affect the life and detection accuracy of the chromatography column, and play the role of protecting the chromatography column and the chromatograph.
- The plug-type design is adopted to ensure the sealing and also effectively avoid the difficult separation problem of the filter head and the bottle mouth after vacuuming.

Key Features:

- It is widely used almost able to meet all the filtration needs of the laboratory.
- Large effective filtration area, save the cost of filter membrane use, and improve the filtration efficiency.
- Good pressure resistance, which can be used for high temperature and high pressure.
- The fixed clip is made of aluminum alloy treated by the anode process, and will not be damaged by corrosion.
- The bottle is made of high borosilicate glass tubing, which is smooth and transparent, no bubbles and wall thickness uniformity.

Membrane Filter

- Membrane filters or "membranes" are polymer films with specific pore ratings.
- Membranes retain particles and microorganisms that exceed their pore ratings by acting as a physical barrier and capturing such particles on the surface of the membrane.
- Labfil® membranes are available in a variety of polymers, pore sizes, diameters, and surface types.
- Biologically inert mixtures of cellulose acetate and cellulose nitrate have made sterile MCE membrane filters one of the most widely used membranes in analytical and research applications.

Features:

- Ideal for capturing and culturing microorganisms in the Water and wastewater industry.
- Used to determine particulate contamination of lubricating oil and hydraulic fluid in patch test kits.
- Available in pore sizes 0.22um and 0.45um, colored black, with a gridded surface.

Customized Service

- LOGO printing, Package Label, Cap Color, Septa Size and Septa Color; all of them can be customized based on huge quantities.
- According to customer needs, various models and specifications of sample vials can be customized, including various septa and packaging.
- Each customized product, from material selection to process, is checked at every level to ensure that the produced products can meet the requirements of all aspects .

Sample Vial				
Ref.No.	C0000750	C0000751	C0000752	C0000753
Description	2mL Clear Glass 12x32mm Flat Base 8-425 Screw Thread Vial with Label and ALWSCI Printing.	2mL Amber Glass 12x32mm Flat Base 8-425 Screw Thread Vial with Label and ALWSCI Printing.	2mL Clear Glass 12x32mm Flat Base 9-425 Screw Thread Vial with Label and ALWSCI Printing.	2mL Amber Glass 12x32mm Flat Base 9-425 Screw Thread Vial with Label and ALWSCI Printing.
Package	100pcs/pk			

Sample Vial				
Ref.No.	C0000754	C0000755	C0000756	C0000757
Description	2mL Clear Glass Flat Base 11mm Crimp Vial Wide Opening with Label and ALWSCI Printing.	2mL Amber Glass Flat Base 11mm Crimp Vial Wide Opening with Label and ALWSCI Printing.	2mL Clear Glass Flat Base 11mm Snap Vial Wide Opening with Label and ALWSCI Printing.	2mL Amber Glass Flat Base 11mm Snap Vial Wide Opening with Label and ALWSCI Printing.
Package	100pcs/pk			

Septa & Closures			
Ref.No.	C0001055	C0001140	C0001415
Description	Blue PTFE/White Silicone Septa. 14.7x3mm (UltraClean).	11mm Transparent TEF/Butyl Red/ Natural Rubber Red-orange Septa.	24-414 Blue Open Top PP Screw Cap with 22mm Natural PTFE/White Silicone Septa 3mm Thick.
Package	100pcs/pk		

Selection Guide

Better Your Chromatography Consumables.

ALWSCI Main Products:

- Analysis: Autosampler Vials & Closures.
- Storage: Sample Vials & Closures.

Selection Guide:

- Proper septa selection is critical to prevent contamination and avoid damage to the needle and instrument.
- The right choice of septa depends on the application.
- For highly sensitive samples, we recommend PTFE-lined Silicone septa, because the PTFE layer has good chemical resistance.
- Besides, septa made of different materials have different safety temperature resistance.

► Septa Selection Guide

Materials	Safety Temperature
PTFE/Silicone	180°C
PTFE/Silicone/PTFE	200°C
Red Rubber/PTFE	-40°C to 110°C
Natural Rubber/TEF Butyl/PTFE	-40°C to 120°C
PE	-20°C to 80°C

► Cap Selection Guide

Materials	Safety Temperature
PP Cap	-20°C to 100°C
Aluminum Cap	-60°C to 300°C
Phenolic Cap	-20°C to 140°C
PC Cap	-50°C to 160°C
